

## Technique and administrative information to be included in the application form

It is important to include the following in the request for genetic disease studies:

- Centre and country of origin.
- Contact person and email-telephone no.
- Requesting physician.
- Identifying reference that should match the specimen.
- Sample extraction date.
- Summary of the clinical history (data identifying the patients, age, gender, age when first symptoms appeared and description, progression of the disease, etc.).
- Patient authorization and informed consent document.
- Approval for study payment.
- Address to send the results and the invoice.

In order to make an enquiry and order diagnostics services, kindly contact the head manager of the Molecular Diagnostics Platform.
